* Handle with care to PREVENT BREAKAGE and the release of mercury vapor

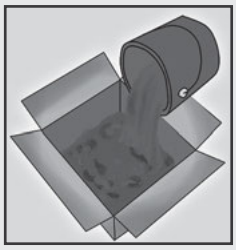
** Place in red sharps container OR plastic soda bottle. Secure lid with tape and place on top of trash (curbside) or alert transfer station attendant.

TIPS — TRANSPORT & DISPOSAL

- Secure your load; keep upright
- Label or identify waste
- Leaks can begin during transport
- Transport in lined cardboard boxes

Latex / Acrylic Paint is non-hazardous and is **NOT** accepted as HHW.

Re-use: Check with used building materials stores for acceptance of full, properly labeled paint cans.



Disposal:

1. Mix **1 part absorbent*** into **1 part latex paint**. Paint cans more than half full can be mixed with absorbent in a lined cardboard box. *cat litter, wood stove pellets, dry sawdust, concrete mix
2. Stir in absorbent until paint has a non-pourable oatmeal-like consistency (drier is better).
3. Allow the mixture to sit for at least one hour.
4. With paint lids removed, dispose of the thickened paint with regular household trash.
